Tuition Balance: The **balance is due at the first class January 16th.** Please understand that the economics of maintaining small, effective classes does not allow for either reduced payments or refunds for missed classes, whether planned or unplanned.

General Information: The **Writing and Critical Reading** preparations involve study for the Grammar Section, a vocabulary study, including Latin and Greek prefixes, suffixes, and roots, as well as a study of successful test taking strategies for the sentence completions and critical reading portions of the test. The **Math Preparation** reviews the Geometry and the more extensive Algebra covered on the SAT, as well as time saving shortcuts and helpful strategies, such as back solving and using special numbers. General test-taking strategies are also taught. Weekly assignments include readings, vocabulary memorization, reworking math problems, and review of class notes. Weekly at home SAT Practice Tests are an integral part of this course, providing the student an opportunity to practice each week's newly learned skills. The proctored practice SATs administered the two Saturdays immediately before the actual SAT further prepare the student. The 8 week Preparation Course, designed with the most effective timing in mind, begins **January 16th** and is scheduled for completion immediately preceding the **SAT test date, March 10th.**
